Uro-Kid Support

The Challenge

Nearly 60% of all Americans are at risk for kidney problems developing in their lifetime. Some symptoms include swelling of legs, ankles, feet &/or hands from fluid retention caused by kidneys failing to eliminate water waste • frequent urination with reduced amount of urine • unexplained shortness of breath • excessive drowsiness or fatigue • persistent nausea • trouble thinking clearly • feeling very itchy

High blood pressure and/or diabetes can lead to kidney disease. Frequent use of aspirin, ibuprofen, Aleve &/or Celebrex can also cause kidney disease. Most medical doctors now prescribe synthetic drugs for kidney ailments which will further damage your kidneys. But you have a choice!

The Solution

Since the kidneys are the primary means for eliminating waste products from the blood such as pesticides, drugs, food additives & most other toxins, we need an optimally functioning urinary system. **Uro-Kid Support** is a 100% Food supplement that will supply nutrients to support healthy kidney & urinary system function. The liver & pancreas will also receive needed nutrients for their optimal functioning.

Glandular supplements such as **Uro-Kid Support** are nutritional products made from various organs & tissues of mammals, usually cattle but sometimes sheep or pigs. Cytotrophin (as seen on the label) means "of cells or groups of cells". Besides supporting damaged organs & tissues, glandulars can often be used to avoid the necessity of taking hormones or prescribed drugs.

Other Benefits Include

- Reduces the possibility of urinary tract infections
- Reduces extra trips to the restroom
- Fights viral & bacterial infections
- Helps lower blood pressure
- Boosts immune system
- Detoxifies the body

Uro-Kid Support (100 % food)

Acerola Berry

- One of the most vitamin C dense foods which helps fight urinary tract infections
- Vitamin C activates arginase, a critical enzyme needed to produce urea--the major organic component of human urine
- Has active anti-fungal properties

Beet Leaf & Root

- Helps eradicate gallstones, kidney stones, bladder disorders & kidney disease
- May reduce serum (blood) urea & creatinine levels to protect kidneys
- Ability to prevent liver damage

Bovine Kidney Cytotrophin

- Supplies kidney tissue which naturally contains kidney enzymes, proteins & other peptides needed for proper renal function
- Recommended for urinary tract infections & to strengthen the kidneys
- Boosts overall kidney health

Bovine Liver Cytotrophin

- Supplies liver tissue which contains substances naturally found in the liver such as the enzyme arginase largely responsible for the synthesis of urea
- Adequate levels of arginase available to normalize urination
- Helps improve liver tissue regeneration & fatty acid & carbohydrate metabolism
- Helps prevent damage to the liver
- Decreases urinary tract infections

Bovine Pancreas Cytotrophin

- Supplies a variety of pancreatic enzymes involved in digestion, which is needed for proper elimination
- A healthy pancreas is instrumental in regulation of blood sugar
- Enhances effectiveness of pancreatic enzymes
- Assists in digestion of grains & other foods

Buckwheat Juice & Seed

- Supports liver & kidney function when toxic overload places stress on these organs
- Most often recommended for capillary & venous health, i.e. bruising & varicose veins
- Supports the intermediate processes involving urea metabolism
- Helps fight viral & bacterial infections
- Buckwheat is not related to wheat

Carrot Root

- Supplies carotenoids such as beta-carotene which helps strengthen the immune system
- Significant protection by detoxification for the liver & other organs including the gall bladder
- Reduces oxidative stress on the kidneys & prevents renal cell damage
- Provides a well-rounded influx of vitamins & minerals
- Helps control blood sugar & improves digestion
- Good source of antioxidants

Corn Silk

- Long been used for urinary & kidney concerns, including diabetes & bedwetting
- Fights bladder infections, kidney stones, & inflammation of urinary system & of the prostate

Dandelion

- Has diuretic effect & is effective for ailments of the liver, kidneys, gall bladder & bladder
- Fights infections of urinary tract, kidney stone formation & fights diabetes
- One of nature's richest green vegetable sources of beta-carotene
- Highly effective as detoxifying herb, especially the liver

Gambir

- Attacks the bad bacteria in the colon causing diarrhea
- Strong antibacterial & algicidal
- Natural treatment for hepatitis
- Helps heal digestive system
- Very high in antioxidants
- Helps heal ulcers

Garlic

- Detoxifies the body & kills bacteria
- Regulates blood sugar levels
- Protects against infection
- Boosts immune system
- Improves circulation

Red Clover

- Acts as diuretic which increases urination to detox the body
- Helps bladder, kidney & urinary problems
- Acts as an antibiotic to fight liver disease
- Powerful immune system booster
- Helps alleviate indigestion
- Blood purifier
